<!-- begin app catalog -->
// it's not just about the apps.
// but the apps do matter.
// and they show what's possible.

//Adopt-a-Hydrant

In the midst of winter snowstorms, buried hydrants cause dangerous delays in the ability of fire fighters to respond to fire emergencies. To check and clear off the thousands of hydrants across the city, Adopt-a-Hydrant lets governments turn to the community. This map-based web app allows individuals, small businesses, and community organizations to volunteer to be responsible for shoveling out specific hydrants.

http://adoptahydrant.org

//Change By Us

Change By Us both crowdsources ideas for improving our cities and gives residents tools to bring those ideas to life. As a marketplace for community projects it enables residents to find local initiatives that matter to them and lets them join in the effort to improve their community. Change By Us also provides a simple kit of web-based tools that make it easy to become a local organizer and bring people together to improve their community.

http://changeby.us

//CityGroups

In cities across the country, there is amazing work being done by community organizers to take on community problems. CityGroups helps publicize these organizations through a collaborative public directory for finding and recommending groups working to make the city better. In doing so, it opens up this valuable data, enabling connections within the community and support from the local government. Since launch, CityGroups has been deployed in four cities.

http://citygroups.org

//ClassTalk

ClassTalk empowers teachers to communicate instantly with their classes through SMS and email, keeping school subjects and class deadlines at the top of a student's mind. Teachers can send messages to an entire class instantly or schedule one to be sent at a future time, and students can reply, providing instant, low-barrier access to their teacher even after class is dismissed. ClassTalk brings out-of-school communication to the devices teachers and students already use everyday.

http://classtalk.org

//CouncilMatic

Keeping up with your city council can at times be difficult with all of the issues addressed and bills proposed, and for many, only a fraction of the activity is relevant to them – either because of topic or location. CouncilMatic makes accessing Philadelphia legislative data as easy as checking your email or reading a blog.

http://councilmatic.org

//DataCouch

DataCouch uses the CouchDB database to build a tool that allows data in spreadsheets to be uploaded and converted to an API for use by other developers. Developers can then create a copy, clean, or add to the data – in turn, making that new dataset available. This removes the major hurdle to data sharing, and allows data to be made immediately available even if it is not in a traditionally web-friendly format.

http://datacouch.com

//DataWorks:Boston

DataWorks is part app catalog, part ideation platform, and part project management tool; but at its core, it is a network of community-members and developers – connecting those with a concept (anyone) with those who have the know-how to turn concept into a creation (developer). The platform not only enables collaboration and project development, but also features completed apps, built in Boston for Boston.

http://buildingboston.org

//DiscoverBPS

Distributing many students across the city – while taking into account factors like walkability, sibling attendance, and personal preference – is a complicated task and creates a process that can seem incomprehensible to parents. By leveraging technology – interactive maps, user-generated reviews, and structured data – we can make the process easier, and we can help parents get the information they need when making an important decision: which school is *right* for my child?

http://discoverbps.org

//Iconathon

With our evolving cities and lifestyles come the need for new symbols to describe our physical environment. To generate these new symbols CFA fellows held six events for hundreds of people around the country – Iconathons – where designers gathered to create (or recreate) icons that represent key aspects of cities and civic life.

http://iconathon.org

//JobOps

Veterans exit the military without the tools they need to compete in the modern job search process. Most services don't provide specialized information for jobs catering to veterans. Veterans deserve a better way of starting their post-military career. JobOps, built in partnership with the White House, is a light-weight tool to integrate online career building services and help veterans find jobs.

http://c4a.me/rjNKqv

//Lunch Roulette

As organizations grow, it's difficult for coworkers to meet new people and break out of their day-to-day bubble. Lunch Roulette brings social networking into the office. The application randomly pairs up two people for a lunch date, and emails them the pairing in the morning – over time, working to match as many people up as possible. It's an easy way to make lunchtime more interesting and fun. It's currently being used by more than 20 organizations.

http://c4a.me/tOEcdO

//Open311 Dashboard

Over the past decade large cities have implemented 311 systems to handle non-emergency service requests such as fixing a pothole. The Open311 API allows web applications to seamlessly interact with the 311 system and it's deluge of data. The Open311 dashboard provides a clean and interactive dashboard that will help track response times, identify service request trends, and give city officials data about the efficiency of various city services.

http://open311.org

//Open211

Social service providers spend as much time making referrals to other providers as they do helping clients directly. The Open211 Rednectory is a crowd-sourced list of social service resources that keeps service providers up-to-date on where clients can find the help they need. Plus, its SMS interface enables individuals to search for resources themselves. Open211 was featured by the White House as an "open data Champion of Change."

http://open211.org

//Public Art App

Conceived in Philadelphia, a city renowned for its murals, the Public Art App merges public datasets that describe public art with user-submitted information to create an interactive public art map for any city. The Public Art app pulls information about the location, artist, and history of public art and displays it in a mobile, multi-platform web app – giving people access to the art as well as its context and meaning.

http://publicartapp.mobi

//PHL API

Cities are teeming with data for developers to leverage in their applications. Getting that data into an app, however, often requires significant effort on the developers part. For Philadelphia, our fellows built PHL API, which makes it easier to access dozens of city datasets on topics as diverse as art, economic indicators and political boundaries. Developers looking to incorporate this data in their own applications now have a simple way to pull it off the web in real time.

http://philapi.com

//ReRoute.it

ReRoute.it is a mobile application that helps people make informed transportation choices. The app does so by turning the regular transit app on its head – instead of choosing the mode of transportation first, ReRoute.it lets you compare every option with regard to time, cost, health, and global warming impact. Is a bike as fast as the bus but a quarter the cost? Info like that helps people understand transportation choices as something that impacts us in many ways.

http://reroute.it

//Septa.mobi

Thanks to the use of GPS on most city buses, cities now have access to real-time data on bus locations and even estimated time of arrival. This information is useful not just to transit administrators, but citizens as well, wondering when the next bus will arrive. Septa.mobi is a real-time mobile bus tracking application for Philadelphia residents that gives them up-to-the-minute information on when buses will arrive at any stop.

http://septa.mobi

//SnapFresh

The Federal Supplemental Nutrition Assistance Program (SNAP) – better know as food stamps – helps low income people put food on the table. Unfortunately, information about which retailers accept food stamps is hard to find. SnapFresh allows users to easily find that information by texting an address to the SnapFresh phone number. Information about the five closest quality food stores is instantly returned via text. SnapFresh uses USDA data and works nationwide.

http://snapfresh.org

//SolarCity

Solar City is a web application that uses ESRI mapping software to calculate solar potential for rooftops. With this tool, basic calculations can demonstrate both the average amount of sunlight that is available and the cost saving opportunities of a switch to solar power. Any city with the necessary geodata can use the app to help consumers understand the viability and potential benefits of solar energy.

http://solar-1.appspot.com

//Where's My School Bus

Last winter, during a major snowstorm, Boston public schools received more than 3,000 calls in a week from concerned parents wondering when their child's delayed school bus would arrive. Where's My School Bus lets parents receive location information through a mobile app so they can track their child's bus in real time, freeing up city call-center resources.

http://schoolbus.bostonpublicschools.org

//Technofinder

Cities are actively trying to provide internet access to the underserved by providing tech centers located throughout the city. Using Technofinder, residents can simply call a toll-free number and input their location to be given a listing, hours, and directions to the tech centers closest to them. Built on top of Chicago's open data, the app can be deployed in any city with the necessary public data.

Choosing a School

What are your choices?

Under Boston's student assignment plan, the city is divided into three geographic "zones"—East, West, and North—for elementary and middle schools. Students entering kindergarten–grade 8 may apply to:

- Schools in the zone in which they live
- Schools in other zones if the schools are within their "walk zone" (see page 4 for details)
- The citywide Hernandez K–8 School and Tarsky Middle School (see page 6).

All high schools are citywide.

For a customized list of all the schools you may apply for, go to www.bostonpublicschools.org/register and click "What Are My Schools?"

How will you decide which school is best for your child?

Introducing the Boston Public Schools 2009 is a good place to start. In the following pages, we will answer many of your questions and introduce you to each of our schools.

Be sure to visit our **Web site** to read school profiles and learn all about the school choice and registration process: www.bostonpublicschools.org/register.

Our **Family Resource Centers** can really help, too. Staff can explain what each school offers, what your options are, and how to apply. They also have information on about:

- Wait lists and transfers, if you want to change schools
- Programs for English language learners and for students with disabilities
- Programs for high achievers
- Before- and after-school programs
- Summer programs
- Parent education and opportunities for family involvement
- Community resources
- ...and much more!

Our Family Resource Centers are listed on page 28. Call or drop by.

We encourage you to visit our schools and talk to relatives, friends, and neighbors whose children attend schools you are considering. All schools are open to visitors during regular school hours. If you want to visit classrooms or speak to the principal and staff, we recommend calling ahead for an appointment—or go during **School Preview Time.**

School Preview Time

November 3, 2008–January 23, 2009

School Preview Time is a great time for families to learn more about our schools before school registration begins. During School Preview Time, each elementary, K–8, middle and high school provides special opportunities to visit classrooms, tour the school, and meet the principal and teachers.

For a schedule of School Preview Time activities, contact any Boston Public Schools Family Resource Center, or visit:

www.bostonpublicschools.org/register

About 30 states and towns, including the City of Boston, offer up-to-four hours of paid time off to state workers before registration. Check to see if your employer is one of them!

Other places that can help you choose schools are:

- **Countdown to Kindergarten, ☏ 617-635-6816 www.countdowntokindergarten.org**
  If you are applying for kindergarten, Countdown has lots of information on how to choose a program, how and when to register, and how to help your child get ready for his or her first exciting first year of school.
- **TABS, www.pbpc.org.** This partnership between the BPS and the YMCA offers workshops and resources in English and Spanish for families who want to learn about the Boston Public Schools. You can sign up for their monthly e-newsletter by visiting their Web site.
- **WGBH "Eye on Education" High School Choice Web site, www.wgbh.org/eyeoneducation/.** If you're an eighth grader living in Boston (or if you are in high school and want to transfer), you have dozens of high school choices. This Web site has lots of information and "tools" to help you and your family find the schools that match your interests.

Choosing a School, page 7 ►

Choosing a School (continued)

child get ready for his or her exciting first year of school.

- **TABS, www.pbpc.org.** This partnership between the BPS and the YMCA offers workshops and resources in English and Spanish for families who want to learn about the Boston Public Schools. You can sign up for their monthly e-newsletter by visiting their Web site.
- **WGBH "Eye on Education" High School Choice Web site, www.wgbh.org/eyeoneducation/.** If you're an eighth grader living in Boston (or if you are in high school and want to transfer), you have dozens of high school choices. This Web site has lots of information and "tools" to help you and your family find the schools that match your interests.

Choosing a School: What to Ask

Ask the principal and teachers about:

- The school's philosophy and expectations for every student
- Student achievement, measured by test scores and performance on projects and written assignments
- The school's plans to help students achieve at higher levels
- The curriculum—what will your child learn in every subject?
- Resources that support active learning, including the library science labs and technology
- Teaching styles to match your child's learning style
- Before- and after-school programs serving the school and neighborhood
- Opportunities for art, music, and physical exercise
- Support services available to students and their families, such as counseling and health services
- School uniforms and dress codes

Who needs to apply for school?

Students who go to a Boston public school now may stay in the school through the school's highest grade. They do not need to complete an application.

A student must apply for school if it...

- The student attends a BPS school and is in the school's highest grade this year—for example, grade 8 in an Early Learning/Early Education Center, grade 5 in a K–5 school, or grade 8 in a middle school or K–8 school.
- The student is in kindergarten—grade 8 and the family moves to a different zone. However, the student may stay in the same school if the parent/guardian agrees to provide transportation.
- The student is in a special program and must go to a different school for a new program.
- The student wants to transfer to another school.
- The student doesn't attend the Boston Public Schools now—even if the student applied and received a BPS assignment last year.

According to state law, each child must attend school beginning in September of the calendar year in which the child turns six years old. *Failure to enroll a child in school could result in legal action against the parent.*

Where to Register

Students who are currently enrolled in the Boston Public Schools will get their application from their school. They do not need to apply in person at a Family Resource Center.

Parents of new-to-BPS students may pre-register on the BPS Web site. But to complete the process, they must visit a BPS Family Resource Center (see page 28).

Required Documents

When you go to register, bring:

- At least three preprinted proofs of your current address in the City of Boston (see details on below).
- An original birth certificate (with raised seal) or passport for children registering for kindergarten (K0, K1, and K2) or grade 1.
- Up-to-date immunization records (see details on this page).

Completing the Application

The application form lets all the schools you may choose:

- Make at least FIVE choices.
- Choose as many schools as you wish.
- Number your choices in order of your preference.
- If you are applying for high school, ask about schools with special admission procedures (pages 25–27).
- Save your copy of the application in case there's a problem.

When to Apply

To increase the chances of receiving an assignment to a school of choice, students should apply in the first registration period for that grade. This schedule is for **new registrations** and **transfer requests** for the 2009–2010 school year.

FIRST REGISTRATION PERIOD
January 5–February 6, 2009
Kindergarten, Grade 6 & Grade 9 only
To avoid long lines, we recommend the following schedule, based on the first initial of the parent's last name:
A–I Register January 5–9
J–Q Register January 12–16
R–Z Register January 20–23
All: Register January 26–February 6

NEW THIS YEAR. Families who are registering a student for kindergarten, grade 6, or grade 9 may register online for children in the family for all other grades during the first registration period. Applications for students registering for grades other than kindergarten and grades 6 and 9 will be processed in the second registration period. They will receive their assignment notice in late April.

SECOND REGISTRATION PERIOD
February 11–March 20, 2009
Kindergarten and Grades 1–12

THIRD REGISTRATION PERIOD
March 23–May 1, 2009
Kindergarten and Grades 1–12

FOURTH REGISTRATION PERIOD
May 4–June 5, 2009
Kindergarten and Grades 1–12

You will receive the notice of your child's assignment by mail. Assignments are usually mailed about six weeks after the close of the registration period.

In the spring, we mail an **RSVP form** to students assigned to the BPS. If you know your child will not attend the Boston Public Schools in September, please sign and return the form so we can assign another student from the wait list. You can also use the RSVP form to tell us if you want to stay on a wait list for other schools.

Residency Requirement for Students

In order to attend Boston Public Schools, a student must live in the City of Boston. The residence of a child under age 18 is the legal residence of the parent(s) or guardian(s) who has physical custody of the child. A student who is age 18 or older may establish a residence separate from his or her parents or guardians for school attendance purposes.

"Residence" is the place where a person lives permanently. Temporary residence in the City of Boston, solely for the purpose of attending a Boston public school, is not considered "residency."

This residency policy does not apply to homeless students. Questions regarding homeless students should be directed to the Office of Legal Advisor, 617-635-9320.

Verification of City of Boston Residency

Before any student is assigned to or invited to attend a Boston Public School, his/her parent or legal guardian must provide at least **three proofs of residency** in the City of Boston. Documentation must be presented with the name and address of the student's parent or guardian and must be presented at the Family Resource Center at the time of registration. Please note that **legal guardianship** requires additional documentation from a court or agency.

These documents are also required for any change of address.

Applicants must submit at least one document from each of the following three groups:

GROUP A
- Copy of latest IRS record of most recent mortgage payment; •
- Copy of Lease (including first and last) showing AND record of most recent rent payment; •
- Legal Affidavit from landlord attesting property deed record of most recent rent payment; •
- Section 8 agreement

• You must submit ONE of these documents.

GROUP B
A utility bill or work stub dated within the past 60 days:
- Gas bill
- Oil bill
- Electric bill
- Home telephone bill •
- Cable bill

• We do not accept cell phone bills or water & sewer bills.

If a family's name is living with an individual or family and does not pay rent, the family may submit a utility bill in the name of the person who owns or leases the property.

GROUP C
- Valid Mass. driver's license
- Current vehicle registration
- Valid Massachusetts photo identification card
- Valid passport

Dated within the past year:
- W-2 form
- Cable tax bill
- Property tax bill

Dated within the past 60 days:
- Letter from an approved government agency
- Typical bank
- Bank or credit card statement

Any school with an approved special admissions policy may opt to accept applicants from non-resident students, but **only students who have presented those valid proofs of Boston residency may be invited or offered admission to a Boston Public School.**

Any student found to be in violation of the residency policy will be discussed immediately from the Boston Public Schools. The parent/guardian of a student dismissed for non-residency may appeal the decision. The student may be allowed to remain in school during the appeal procedure.

In addition to dismissal from school, the Boston Public Schools may impose penalties on the family such as legal action, a fine based on the cost of educational services received, and the withholding of certain scholarships and prizes.

When to Register

Students who are currently enrolled in the Boston Public Schools will get their application from their school. They do not need to apply in person at a Family Resource Center.

Parents of new-to-BPS students may pre-register on the BPS Web site. But to complete the process, they must visit a BPS Family Resource Center (see page 28).

When to Apply

To increase the chances of receiving an assignment to a school of choice, students should apply in the first registration period for that grade. This schedule is for **new registrations** and **transfer requests** for the 2009–2010 school year.

FIRST REGISTRATION PERIOD
January 5–February 6, 2009
Kindergarten, Grade 6 & Grade 9 only
To avoid long lines, we recommend the following schedule, based on the first initial of the parent's last name:
A–I Register January 5–9
J–Q Register January 12–16
R–Z Register January 20–23
All: Register January 26–February 6

NEW THIS YEAR. Families who are registering a student for kindergarten, grade 6, or grade 9 may register online for children in the family for all other grades during the first registration period. Applications for students registering for grades other than kindergarten and grades 6 and 9 will be processed in the second registration period. They will receive their assignment notice in late April.

SECOND REGISTRATION PERIOD
February 11–March 20, 2009
Kindergarten and Grades 1–12

THIRD REGISTRATION PERIOD
March 23–May 1, 2009
Kindergarten and Grades 1–12

FOURTH REGISTRATION PERIOD
May 4–June 5, 2009
Kindergarten and Grades 1–12

You will receive the notice of your child's assignment by mail. Assignments are usually mailed about six weeks after the close of the registration period.

In the spring, we mail an **RSVP form** to students assigned to the BPS. If you know your child will not attend the Boston Public Schools in September, please sign and return the form so we can assign another student from the wait list. You can also use the RSVP form to tell us if you want to stay on a wait list for other schools.

Immunizations

The Boston Public Schools requires that students must have immunizations that are up-to-date for school every as the term they register for school. This means that the following immunizations are said to be in place at registration:

Grade:	K0 (age 3);	K1/K2 (ages 4–5);	Gr. 1–6	Gr. 7–12
Hepatitis B	3	3	3	3
DtaP/DTP	4	3	4 or	4 or
DT/Td			5	3 +
Tdap booster				1
Polio	≥ 3	4	≥ 3	≥ 3
MMR	1–4	0	0	0
Varicella (chickenpox)	1*	1*	1*	1–2*

(*or documentation of disease)

NOTE: If a child has turned 4 years old by the registration date, he or she must have received the K1/K2 immunizations. However, if the child is only 3 years old at registration, he or she is NOT expected to have received the 4-year-old immunizations.

To learn more, go to: www.mass.gov/dph/cdc/immunization/msgschoolentry.pdf. Contact BPS Health Services, 617-635-6788, if you have questions. In addition, we strongly recommend that your child have a tuberculosis (TB) Assessment.

When you register your child for school you must submit a doctor's record stating your child has had the required immunizations. The record must include the month, day, and year when the immunizations were given. If you need a copy of the immunization record or have questions, contact your doctor or health center. If you don't have a doctor or health center, call the Mayor's Health Line, 800-847-0710. Please allow two to three weeks for your doctor or health center to supply records.

Keep in mind that school nurses review immunization records regularly.

By law, students whose immunizations are not up-to-date may be excluded from school.

Special Situations. Except in an emergency or epidemic, students may start school if a parent or guardian presents a written statement from a physician that their child has not been immunized for medical reasons or a letter stating that immunization conflicts with his or her religious beliefs.

Please see page 7 for information on physical examinations.

How does the BPS assign students?

Assignments are made by a computer that is programmed with a **mathematical formula.** The computer program tries to assign students to their highest listed **choice** for which they have the highest **priority.**

For more information about how the formula works, call 617-635-9516.

What are priorities?

Sometimes a school doesn't have room for every student who lists it as a choice. When this happens, the computer assigns students based on choice and **priorities.** Here are the major priorities, with the highest listed first:

1. Sibling – walk zone
2. Sibling
3. Walk zone (a priority for 50% of available seats)
4. Random number

Within each assignment priority, students with the highest priority are assigned first.

Inside the school assignment maze

Taking a chance, making a choice

The lottery assigning Boston kindergartners to classrooms is designed to be fair, but with too few good schools to choose from, too many opt to leave. (By James Vaznis, Globe Staff)

The Boston Globe

Selection process starts with choices, ends with luck

In towns across America, families buy homes knowing exactly where their kids will go to school. Like their post office, their parish, and their neighborhood pub, it’s usually the closest one. (By Stephanie Ebbert, Globe Staff)
